➜ Multiple years of PHP development experience

➜ Experience in Database systems

➜ Knowledge of SOLID design principles

➜ Thinking in RESTful interfaces (XML/JSON/SOAP)

➜ Test Driven development

➜ At least a bachelor's degree

➜ Agile mindset

➜ Team-minded

➜ Leadership experience beneficial

What we offer

➜ A modern and spacious workplace

➜ Up to four people offices giving you space to communicate as well as focus

➜ Choose between modern platforms to work with the system you work best

➜ Home office option

➜ Free coffee, juices, and water

➜ Competitive salary

➜ 25 vacation days

About the company

easybell is an internet and telephony provider for individuals as well as business clients. Our most important products are DSL connections, SIP trunks, our cloud telephony appliance, and voice over ip telephony.

The company was founded in 2006 and is located in the very center of Berlin. We are part of the market-listed ecotel group which provides us with excellent access to affordable upfront services.

Our inexpensive rates feature fair contract conditions with no minimum duration. We develop our products and services from an understandable and flexible point of view.
